

Kurzweil PC3K/PC3 2.10 Feature Highlights

March 2012

ENHANCED LIVE PERFORMANCE TOOLS

Display: Large

For live situations under low light or for floor demos, Master Mode new display mode "Large" shows the currently selected program or setup using a large size font.

ProgramMode XPHost Exp 2:74 #Ch:1
841 2' Viol
842 Pro Piano
843 Big Pop Piano
Octav- Octav+ Panic Info XPose- XPose+

Safe Mode: On

For live, especially theatrical, or very critical situations where any involuntary soft button press (mainly transposition) could cause the player a problem, safe mode disables the soft buttons functionality from program or setup select modes.

SetupMode XPHost
148 NewAgeComPer
149 Voyager One
150 OrchestraOfBells

QACategory: Favorite / MIDIState

In QA Mode, the 16 instrument Category buttons now offer two new modes of functionality:

QACategory: Favorite - Using the press/hold paradigm (like a car radio), each category button can store/recall a quick access bank itself. In addition to the existing bank navigation methods, this new option offers fast, one-button access to 16 of your most *favorite* quick access banks.

QACategory: MIDIState - For third party template based VA libraries like "Let's VA" or "Moose Attack", QA mode now allows the user to take a 'snapshot' of the entire MIDI state of the PC3 at a particular moment and save it to a category button as a recallable preset. These presets can be exported and loaded back using Storage mode.

UPGRADED PORTAMENTO

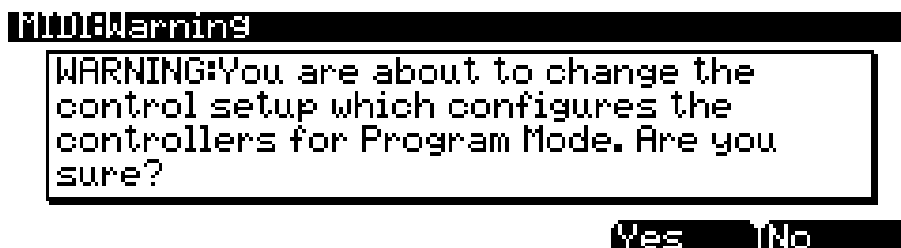

Portamento: On

Monophonic programs with portamento - notes now keep gliding when sustained by the sustain pedal.

IMPROVED ALERT MESSAGING

ControlSetup

To help avoid unintentional programming accidents that can potentially affect the global operation of the PC3, a new warning message is now displayed whenever attempting to change or edit the Control Setup (considered a more advanced application).

Storage

An error message is now displayed when attempting to store data onto a device that is out of space.

MISCELLANEOUS ENHANCEMENTS

Song Mode:

- Tracks now respect destinations (MidiDst) for play/record as well as MIDI Xmit Destination.
- Changing from Song to Program Mode (w/ FX Mode: Performance) now loads the correct effects.
- Program changes sent by a Song now respect the MIDI CHANLS PrgLock.

Improved K2-series program conversion

PC3K Series:

Improved speed in loading non-contiguous samples from a USB device.

For complete revision details, please see the 'Release Notes' contained within the update package.
